“C. RATIONALE

The Demerged Company is inter alia engaged in Container Business, Non-Container Business and Corporate Services Business. The management believes that the risk and reward associated with each of the aforesaid businesses are different with different stakeholders. As part of restructuring of its businesses and with a view to achieve strategic independence of its business verticals (unlocking the potential of each of the businesses) and to leverage the expertise of its strategic investor, the management of the Demerged Company proposes to (i) demerge the Demerged Undertaking 1, on a going concern basis, into J M Baxi Container; and (ii) demerge the Demerged

Undertaking 2, on a going concern basis, into J M Baxi Dev Co. Further, the Demerged Company shall continue to be engaged in the Non-Container Business. The management believes that the proposed segregation of business shall benefit all stakeholders of the Companies and also result in the following benefits:

- 1. The Demerged Undertakings have achieved scale and experience to sustain business based on their own strengths. Additionally, these businesses deal with different sets of industry dynamics in the form of nature of risks, competition, challenges, opportunities and business methods. Hence, segregation of the Identified Container Business and Corporate Services Business would enable focused management and enable exploring the potential business opportunities more effectively and efficiently.*
 - 2. The Demerger will enable both Demerged Company and the Resulting Companies to enhance business operations by streamlining operations, cutting costs, more efficient management control and outlining independent growth strategies.*
 - 3. The Demerger will allow the management to devise, implement and pursue independent business strategies for the Identified Container Business, Non-Container Business and Corporate Services Business which will enable wider scope for independent collaboration, investment opportunities and expansion.*
 - 4. The Resulting Company 1, with clear identity of being an Identified Container Business will enable right customer attention resulting in deeper market penetration.*
 - 5. The Resulting Company 2, with clear identity of being in the Corporate Services Business, will enable to drive overall strategy, manage bidding for new and performance of existing businesses.*
 - 6. Ability to leverage financial and operational resources in each business will lead to possibilities of joint ventures and associations with other industry participants, both in India and globally, and will facilitate attracting greater talent pool.*
 - 7. Each business will be able to address independent business opportunities with efficient capital allocation and attract different set of investors, strategic partners, lenders and other stakeholders, thus leading to enhanced value creation, which is in the best interest of the Demerged Company and Resulting Companies and their respective stakeholders.*
- In view of the aforesaid, the Board of Directors of the Companies have considered and proposed this Scheme and matters incidental thereto pursuant to the provisions of Sections 230 to 232 and other applicable provisions of the Act.”*

Provision of valuation opinions and consideration of the issues described herein are areas of our regular practice. The services do not represent accounting, assurance, accounting/ tax due diligence, consulting or tax related services that may otherwise be provided by us.

This Report, its contents and the results herein are specific and subject to:

- the purpose of valuation agreed as per the terms of this engagement;
- the date of this Report; and
- based on the Sources of Information outlined above including information provided by the Management of the Companies which we believe to be reliable.

The Management of J M Baxi have represented that the business activities of J M Baxi have been carried out in the normal and ordinary course between 31 July 2023 and report date. Further, no material adverse change has occurred in the respective financial position between 31 July 2023 and report date. Further, the Management of the Resulting Companies have represented that the business activities of the Resulting Companies have been carried out in the normal and ordinary course between 31 December 2023 and report date. Further, no material adverse change has occurred in the respective financial position between 31 December 2023 and report date.

A value analysis of this nature is based on information made available to us as of the date of this Report, events occurring after that date hereof may affect this Report and the assumptions used in preparing it, and we do not assume any obligation to update, revise or reaffirm this Report.

The recommendation(s) rendered in this Report only represent our recommendation(s) based upon information furnished by the Management till the date of this Report and other sources, and the said recommendation(s) shall be considered to be in the nature of non-binding advice (our recommendation should not be used for advising anybody to take buy or sell decision, for which specific opinion needs to be taken from expert advisors).

In the course of our analysis, we were provided with both written and verbal information, by the Management as detailed in the section- Sources of Information.

In accordance with the terms of our engagement, we have assumed and relied upon, without independent verification of,

- the accuracy of information made available to us by the Management, which formed a substantial basis for this Report; and
- the accuracy of information that was publicly available.

We have not carried out a due diligence or audit or review of the Companies for the purpose of this engagement, nor have we independently investigated or otherwise verified the data provided.

We are not legal or regulatory advisors with respect to legal and regulatory matters for the proposed demerger. We do not express any form of assurance that the financial information or other information as prepared and provided by the Management is accurate. Also, with respect to explanations and information sought from the Management, we have been given to understand by the Management that they have not omitted any relevant and material factors and that they have checked the relevance or materiality of any specific information to the present exercise with us in case of any doubt. Accordingly, we do not express any opinion or offer any form of assurance regarding its accuracy and completeness.

The determination of a share entitlement ratio is not a precise science and the conclusions arrived at in many cases will, of necessity, be subjective and dependent on the exercise of individual judgement. This concept is also recognized in judicial decisions. There is, therefore, no indisputable single share entitlement ratio. While we have provided our recommendation of the proposed share entitlement ratio(s) based on the information available to us and within the scope and constraints of our engagement, others may have a different opinion. The final responsibility for the determination of the share entitlement ratio for the Proposed Demerger shall be with the Companies.

Our conclusions are based on these assumptions and information given by/ on behalf of the Management. The Management of the Companies have indicated to us that they have understood that any omissions, inaccuracies or misstatements may materially affect our recommendation. Accordingly, we assume no responsibility for any errors in the information furnished by the Management and their impact on the Report. Also, we assume no responsibility for technical information (if any) furnished by the Management. However, nothing has come to our attention to indicate that the information provided was materially misstated/ incorrect or would not afford reasonable grounds upon which to base the Report. We do not imply and it should not be construed that we have verified any of the information provided to us, or that our inquiries could have verified any matter, which a more extensive examination might disclose.

We must emphasize that pursuant to the Scheme, upon completion of the Proposed Demerger, the Resulting Company 1 and Resulting Company 2 each shall issue equity shares to all the equity shareholders of the Demerged Company. Given that share entitlement ratio would not have any bearing on the ultimate economic interest post implementation of the Proposed Demerger, since the ultimate beneficiary would in addition to its equity shareholding in the Demerged Company receive equity shares from the Resulting Companies and would hold 100% economic interest either directly or indirectly in both the Demerged Company as well as the Resulting Companies. We have therefore not independently carried out the fair valuation of equity shares of the Companies for the purpose of our analysis.

The Report assumes that the Companies comply fully with relevant laws and regulations applicable in all its areas of operations and that the Companies will be managed in a competent and responsible manner. Further, except as specifically stated to the contrary, this Report has given no consideration on to matters of a legal nature, including issues of legal title and compliance with local laws and litigation and other contingent liabilities that are not recorded in the financial statements of the Companies.

This Report does not look into the business/ commercial reasons behind the Proposed Demerger nor the likely benefits arising out of the same. Similarly, the Report does not address the relative merits of the Proposed Demerger as compared with any other alternative business transaction, or other alternatives, or whether or not such alternatives could be achieved or are available. This Report is restricted to recommendation of share entitlement ratio for the Proposed Demerger only.

Certain terms of the Proposed Demerger are stated in our Report, however the detailed terms of the Proposed Demerger shall be more fully described and explained in the Scheme document to be submitted with relevant authorities in relation to the Proposed Demerger. Accordingly, the description of the terms and certain other information contained herein is qualified in its entirety by reference to the Scheme document.

The fee for the Engagement is not contingent upon the results reported.

We owe responsibility only to the Board of Directors of J M Baxi, J M Baxi Container and J M Baxi Dev Co, who have appointed us, and nobody else. We do not accept any liability to any third party in relation to the issue of this Report. It is understood that this analysis does not represent a fairness opinion. In no circumstance shall the liability of TS exceed the amount as agreed in our Engagement Letter.

This share entitlement ratio Report is subject to the laws of India.

Neither the Report nor its contents may be referred to or quoted in any registration statement, prospectus, offering memorandum, annual report, loan agreement or other agreement or document given to third parties, without our prior written consent other than in connection with the Proposed Transaction. In addition, we express no opinion or recommendation as to how the shareholders of the Companies should vote at any shareholders' meeting(s) to be held in connection with the Proposed Transaction. Our Report and the opinion contained herein is not and nor should it be construed as advice relating to investing in, purchasing, selling, or otherwise dealing in securities or as providing management services or carrying out management functions.

Neither the Report nor its contents may be referred to or quoted in any registration statement, prospectus, offering memorandum, annual report, loan agreement or other agreement or document given to third parties, other than in connection with the purpose of recommending the share entitlement ratio for the proposed demerger and relevant filings with the statutory authorities with respect to the proposed demerger, without our prior written consent.

RATIONALE FOR SHARE ENTITLEMENT RATIO

As mentioned earlier, as a part of the Scheme, the Identified Container Business and Corporate Services Business from J M Baxi is proposed to be demerged into J M Baxi Container and J M Baxi Dev Co respectively. J M Baxi has identified all the assets and liabilities of the Identified Container Business and Corporate Services Business, which are to be taken over by and transferred to J M Baxi Container and J M Baxi Dev Co respectively.

In view of the above and considering that the Demerged Company intends to hold the existing capital currently held in the Resulting Companies we note that Proposed Demerger will not have any impact on the beneficial economic interest of the shareholders of J M Baxi as the equity shareholders of J M Baxi would continue to have the same beneficial economic interest in the Resulting Companies and Demerged Companies by way of direct equity ownership and indirect equity ownership. As the Proposed Demerger will not affect the beneficial economic interest of the equity shareholders of J M Baxi, valuation of J M Baxi, Identified Container Division, Corporate Services Business, J M Baxi Container and J M Baxi Dev Co has no bearing on the recommended share entitlement ratio and accordingly, we have not carried out any valuation in the instant case.

RECOMMENDATION OF SHARE ENTITLEMENT RATIO

Taking into account the above facts and circumstance, any share entitlement ratio can be considered appropriate and fair for the Proposed Demerger. Accordingly, basis our review, information made available to us, minimising fractional entitlement in hands of equity shareholders and discussion with the Management, we recommend the following share entitlement ratio:

Demerger of Identified Container Business from J M Baxi into J M Baxi Container:

"1 (One) Equity Share of J M Baxi Container of face value of INR 1 each fully paid up shall be issued for every 1 (One) equity share held in J M Baxi having face value of INR 1 each fully paid up",

Demerger of Corporate Services Business from J M Baxi into J M Baxi Dev Co:

"1 (One) Equity Share of J M Baxi Dev Co of face value of INR 1 each fully paid up shall be issued for every 1 (One) equity share held in J M Baxi having face value of INR 1 each fully paid up",

We believe that the above ratio is fair considering that all the shareholders of J M Baxi as on the record date of the Scheme are and will, upon Demerger, be the ultimate beneficial owners of J M Baxi Container and J M Baxi Dev Co in the same ratio directly and indirectly as they hold shares in J M Baxi.

Responsibilities of management and those charged with governance for the financial statements

5. The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Act with respect to the preparation of these standalone financial statements that give a true and fair view of the financial position, financial performance, changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Accounting Standards specified under Section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.
6. In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so. Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's responsibilities for the audit of the financial statements

7. Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.
8. As part of an audit in accordance with SAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:
 - Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

Report on the Internal Financial Controls with reference to Financial Statements under clause (i) of sub-section 3 of Section 143 of the Act

1. We have audited the internal financial controls with reference to financial statements of J M Baxi Ports & Logistics Private Limited (Earlier known as J M Baxi Ports & Logistics Limited) ("the Company") as of March 31, 2024 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

2. The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting ("the Guidance Note") issued by the Institute of Chartered Accountants of India ("ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditor's Responsibility

3. Our responsibility is to express an opinion on the Company's internal financial controls with reference to financial statements based on our audit. We conducted our audit in accordance with the Guidance Note and the Standards on Auditing deemed to be prescribed under Section 143(10) of the Act to the extent applicable to an audit of internal financial controls, both applicable to an audit of internal financial controls and both issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to financial statements was established and maintained and if such controls operated effectively in all material respects.
4. Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system with reference to financial statements and their operating effectiveness. Our audit of internal financial controls with reference to financial statements included obtaining an understanding of internal financial controls with reference to financial statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.
5. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system with reference to financial statements.

Meaning of Internal Financial Controls with reference to financial statements

6. A company's internal financial controls with reference to financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial controls with reference to financial statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls with reference to financial statements

7. Because of the inherent limitations of internal financial controls with reference to financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to financial statements to future periods are subject to the risk that the internal financial controls with reference to financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

8. In our opinion, the Company has, in all material respects, an adequate internal financial controls system with reference to financial statements and such internal financial controls with reference to financial statements were operating effectively as at March 31, 2024, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note issued by ICAI.

iv Use of estimates and judgements

In preparing these standalone financial statements, management has made judgements, estimates and assumptions that affect the reported amounts of assets, liabilities, income and expenses. Actual result may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised prospectively.

Judgements

Information about judgments made in applying accounting policies that have the most significant effects on the amounts recognised in the standalone statement of profit and loss:

Determining whether an arrangement contains a lease

The Company evaluates if an arrangement qualifies to be a lease as per the requirements of Ind AS 116. Identification of a lease requires significant judgment. The Company uses significant judgement in assessing the lease term (including anticipated renewals) and the applicable discount rate.

The Company determines the lease term as the non-cancellable period of a lease, together with both periods covered by an option to extend the lease if the Company is reasonably certain to exercise that option; and periods covered by an option to terminate the lease if the Company is reasonably certain not to exercise that option. In assessing whether the Company is reasonably certain to exercise an option to extend a lease, or not to exercise an option to terminate a lease, it considers all relevant facts and circumstances that create an economic incentive for the Company to exercise the option to extend the lease, or not to exercise the option to terminate the lease.

The discount rate is generally based on the incremental borrowing rate specific to the lease being evaluated or for a portfolio of leases with similar characteristics.

Assumptions and estimation uncertainties

Information about assumptions and estimations of uncertainties that have a significant risk of resultant material adjustment in the year ended 31 March 2024 are as follows:

a) Useful lives of property, plant and equipment and intangible assets

Determination of the estimated useful lives of tangible assets and the assessment as to which components of the cost may be capitalised. Useful lives of tangible assets are based on the life prescribed in Schedule II of the Companies Act, 2013. In cases, where the useful lives are different from that prescribed in Schedule II, they are based on technical advice, taking into account the nature of the asset, the estimated usage of the asset, the operating conditions of the asset, past history of replacement, anticipated technological changes, manufacturers' warranties and maintenance support. Assumptions also need to be made, when the Company assesses, whether an asset may be capitalised and which components of the cost of the asset may be capitalised.

b) Recognition and measurement of defined benefit obligations

The obligation arising from defined benefit plan and other long term employment benefits is determined on the basis of actuarial assumptions. Key actuarial assumptions include discount rate, trends in salary escalation and vested future benefits and life expectancy. The discount rate is determined by reference to market yields at the end of the reporting period on government bonds. The period to maturity of the underlying bonds correspond to the probable maturity of the post-employment benefit obligations.

c) Recognition of deferred tax assets

Deferred tax assets are recognised for the future tax consequences of temporary differences between the carrying values of assets and liabilities and their respective tax bases, and unutilised business loss and depreciation carry-forwards and tax credits. Deferred tax assets are recognised to the extent that it is probable that future taxable income will be available against which the deductible temporary differences, unused tax losses, depreciation carry-forwards and unused tax credits could be utilised.

d) Impairment of trade receivables

The Company reviews its trade receivables to assess impairment at regular intervals. The Company's credit risk is primarily attributable to its trade receivables. In determining whether impairment losses should be reported in the standalone statement of profit and loss, the Company makes judgments as to whether there is any observable data indicating that there is a measurable decrease in the estimated future cash flows. Accordingly, an allowance for expected credit loss is made where there is an identified loss event or condition which, based on previous experience, is evidence of a reduction in the recoverability of the cash flows.

e) Impairment losses on investments

The Company reviews its carrying value of investments carried at amortised cost annually, or more frequently when there is indication for impairment. If the recoverable amount is less than its carrying amount, the impairment loss is accounted for.

f) Others

Further information about assumptions and estimations of uncertainties that have a significant risk of resultant material adjustment in the year ended 31 March 2024 are as follows:

- recognition and measurement of provisions and contingencies; key assumptions about likelihood and magnitude of an outflow of resource;
- fair value measurement of financial instruments; and (including derivative instruments i.e. foreign currency forward contract and cross currency interest rate swap);

v Measurement of fair values

The Company's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities. The Company has an established control framework with respect to the measurement of fair values, which includes overseeing all significant fair value measurement, including level 3 fair values by the management. The management regularly reviews significant unobservable inputs and valuation adjustments. If third party information, such as broker quotes or pricing services, is used to measure fair values, then the management assesses the evidence obtained from the third parties to support the conclusion that such valuations meet the requirements of Ind AS, including the level in the fair value hierarchy in which such valuations should be classified.

When measuring the fair value of a financial asset or a financial liability, the Company uses observable market data as far as possible. Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows.

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement. The company recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

vi Business combinations

Business combinations arising from transfer of interests in entities that are under the control of the shareholders that controls the Company are accounted for using Ind AS 103, Business combinations as if the acquisition had occurred at the beginning of the earliest comparative period presented or, if later, at the date that common control was established; for this purpose comparatives are revised. The assets and liabilities acquired are recognised at their carrying amounts. The identity of the reserves is preserved and they appear in the standalone financial statements of the Company in the same form in which they appeared in the standalone financial statements of the acquired entity. The difference, if any, between the consideration and the amount of share capital of the acquired entity is transferred to capital reserve/reserve / Amalgamation Adjustment Deficit Account.

2 A Material accounting policies of financial statements

2.1 Classification of assets and liabilities

Schedule III to the Act, requires assets and liabilities to be classified as either Current or Non-current

- a) An asset shall be classified as current when it satisfies any of the following criteria
- i) it is expected to be realised in, or is intended for sale or consumption in, the company's normal operating cycle,
 - ii) it is held primarily for the purpose of being traded;
 - iii) it is expected to be realised within twelve months after the reporting date, or
 - iv) it is Cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting date.
- b) All assets other than current assets shall be classified as non-current
- c) A liability shall be classified as current when it satisfies any of the following criteria
- i) it is expected to be settled in the Company's normal operating cycle,
 - ii) it is held primarily for the purpose of being traded,
 - iii) it is due to be settled within twelve months after the reporting date, or
 - iv) the company does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting date

d) All liabilities other than current liabilities shall be classified as non-current

2.2 Operating cycle

An operating cycle is the time between the acquisition of assets for processing and their realisation in cash or cash equivalents. The Company has ascertained the operating cycle as twelve months for the purpose of current or non-current classification of assets and liabilities

2.3 Property, plant and equipment

Property, plant and equipment ("PPE") is carried at cost of acquisition or construction less accumulated depreciation and impairment loss, if any. Cost comprises its purchase price, including inward freight, duties, taxes (to the extent not recoverable from tax authorities) and expenses incidental to acquisition and installation of the asset up to the time the assets are ready for intended use. Subsequent expenditure on an asset after its purchase/completion is recognised as an expense when incurred unless it is probable that such expenditure will enable the asset to generate future economic benefits associated with the expenditure will flow to the Company and such expenditure can be measured and attributed to the asset reliably, in which case such expenditure is added to the cost of the asset

Losses arising from retirement of and gains/ losses arising from disposal of PPE which are carried at cost are recognised in the statement of profit and loss

2.4 Other intangible assets

(i) Other intangible assets

Other intangible assets comprise of Computer Software and Railway licence fees and are carried at cost less accumulated amortisation and impairment losses, if any. The cost of an intangible asset comprises its purchase price, including any import duties and other taxes (other than those subsequently recoverable from the taxing authorities), and any directly attributable expenditure on making the asset ready for its intended use and net of any trade discounts and rebates. Subsequent expenditure is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure, including expenditure on internally generated goodwill and brands, is recognised in profit or loss as incurred

(ii) Service concession arrangements

The Company recognises its exclusive port concession rights granted under the Concession Agreement as "Intangible Assets", in which the Concessions Authority controls or regulates the services provided (the prices charged and controls any significant residual interest in the infrastructure such as PPE, if the infrastructure is constructed or purchased by the Company as part of the Concession Agreement. Such an intangible asset is recognised by the Company at fair value (which is the cost of the consideration received or receivable for the construction service delivered) and is capitalised when the project is complete in all respects and the Company receives the completion certificate from the Concessions Authority as specified in the concession agreement. Port concession rights also include certain PPE which are reclassified as intangible assets in accordance with Appendix C of Ind AS 115 Revenue from Contracts with Customers

Subsequent expenditure is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditures recognised the statement of profit and loss as incurred

2.5 Depreciation and amortisation

The depreciable amount of an item of Property, plant and equipment is allocated on a systematic basis over its useful life. The Company provides depreciation on the straight line method over the useful lives as prescribed under Schedule II of the Act or as per technical assessment of the Company. The Company believes that straight line method reflects the pattern in which the asset's future economic benefits are expected to be consumed by the Company. The residual values, useful lives and method of depreciation are reviewed at least at each financial year-end and adjusted prospectively, if appropriate.

Depreciation on additions/ (disposals) are provided on a pro-rata basis i.e. from/ (up to) the date on which the asset is ready to use/ (disposed off).

Provided that where a company adopts a useful life different from what is specified in Part C, the financial statements shall disclose such difference and provide justification in this behalf duly supported by technical advice:

Amortisation is calculated to write off the cost of intangible assets less their estimated residual values using the straight line method over their estimated useful lives, and is generally recognised in profit and loss. The computer software is amortised over the license period or 5 years whichever is less. Railway License fees is amortised over the period of 20 years.

Assets	Management estimate of useful life	Useful life as per Schedule II
Lease hold improvements	Amortised over the lease period	Amortised over the lease period
Building	30 to 60 years	60 years
Plant and Equipment	3 to 21 years	8 to 15 years
Computers	3 to 6 years	3 to 6 years
Furnitures and Fixtures	1 to 16 years	10 years
Vehicles	7 to 10 years	8 to 10 years
Office equipments	3 to 21 years	5 years
Electrical Installation	Amortised over the lease period	Amortised over the lease period
Trailors	3 to 7 years	8 years
Railway siding and rolling stocks	15 years	15 years

Individual assets costing Rs. 5,000 or less are fully depreciated in the year of its acquisition.

2.6 Revenue recognition

The Company had adopted Ind AS 115 – Revenue from Contracts with Customers for annual reporting period commencing from 1 April 2018. The Company has adopted Ind AS 115 using the modified retrospective method of adoption. Such adoption did not result into any adjustments in the financial statements.

Revenue is recognised upon transfer of control of promised services to customer in an amount that reflects the consideration which the Company expects to receive in exchange for those service.

In arrangements for rendering of services, the Company has applied the guidance in Ind AS 115, Revenue from contract with customer, by applying the revenue recognition criteria for each distinct performance obligation. The arrangements with customers generally meet the criteria for considering service as distinct performance obligations. For allocating the transaction price, the Company has measured the revenue in respect of each performance obligation of a contract at its relative standalone selling price. The price that is regularly charged for an item when sold separately is the best evidence of its standalone selling price. In cases where the Company is unable to determine the standalone selling price, the Company uses the expected cost plus margin approach in estimating the standalone selling price. The transaction price is also adjusted for the effects of the time value of money if the contract includes a significant financing component. Any consideration payable to the customer is adjusted to the transaction price, unless it is a payment for a distinct product or service from the customer.

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured. The amount recognised as revenue is exclusive of Goods and services tax (GST) and is net of discounts.

Port operation services and Logistics services

Revenue from port operation services and logistics services, including handling and transportation charges, ground rent and storage, rail infrastructure and other ancillary port services are recognized in the accounting period in which the services are provided to the customer at an amount that reflects the consideration to which the company expects to be entitled in exchange for those services.

2.6 Revenue recognition (Continued)

Equipment hire charges

Equipment hire charges includes revenue from hiring of cranes, trailer and other equipment. Revenue from equipment hire charges leased out under an operating lease are recognised over the tenure of the lease / service agreement on a straight line basis, except where there is uncertainty of ultimate collection.

Rail freight income, road transportation and trailer operations

Rail freight income is recognised at the time the rake is dispatched from the place of origin. However, in case of inbound cargo, the income is recognised at the time the rake reaches the Inland Container Depot.

Other income

Business support charges, container lease charges and other ancillary income are recognised when related services are performed.

Reimbursement of cost is netted off with the relevant expenses incurred, since the same are incurred on behalf of the customers.

Contract assets are recognised when there is excess of revenue earned over billings on contracts. Contract assets are classified as unbilled receivables (only act of invoicing is pending) when there is unconditional right to receive cash, and only passage of time is required, as per contractual terms.

Contract liabilities are recognised when there is billing in excess of revenue and advance received from customers.

Ancillary revenue is recognised upon completion of the services provided. All revenue is stated exclusive of Goods and Services Tax (GST).

Discounts are netted off against revenue and are provided based on individual contracts/ operating arrangements entered in to with the customers on accrual basis after satisfaction of performance obligation as per the individual contracts / operating arrangements.

Interest income

Interest income is recognised using the effective interest method. The 'effective interest rate' is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument to:

- the gross carrying amount of the financial asset; or
- the amortised cost of the financial liability.

In calculating interest income, the effective interest rate is applied to the gross carrying amount of the asset (when the asset is not credit-impaired) or to the amortised cost of the liability. However, for financial assets that have become credit-impaired subsequent to initial recognition, interest income is calculated by applying the effective interest rate to the amortised cost of the financial asset. If the asset is no longer credit-impaired, then the calculation of interest income reverts to the gross basis.

Dividend from investments is recognized when the right to receive the payment is established and when no significant uncertainty as to measurability or collectability exists.

Commission income on financial guarantee is measured at fair value and recognised over the period of financial guarantee on time proportion method.

2.7 Impairment of financial and non-financial assets

i. Impairment on non-financial assets

The Company's non-financial assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated.

2 Material accounting policies of financial statements(Continued)

2.7 Impairment of financial and non-financial assets (Continued)

i. Impairment on non-financial assets (Continued)

An impairment loss in respect of goodwill is not subsequently reversed. In respect of other assets for which impairment loss has been recognised in prior periods, the Company reviews at each reporting date whether there is any indication that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. Such a reversal is made only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised. In respect of the assets for which impairment loss has been recognised in prior periods, the Company reviews at each reporting date whether there is any indication that the loss has decreased or no longer exists. When there is indication that an impairment loss recognised for an asset (other than a revalued asset) in earlier accounting periods which no longer exists or may have decreased, impairment loss is reversed to the extent the amount was previously charged to the Restated standalone financial statements of Profit and Loss. In case of revalued assets, such reversal is not recognised.

ii. Impairment on financial assets

The Company recognises loss allowances for expected credit losses on:

- financial assets measured at amortised cost; and
- financial assets measured at FVOCI- debt investments

At each reporting date, the Company assesses whether financial assets carried at amortised cost and debt securities at FVOCI are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- significant financial difficulty of the borrower or issuer;
- a breach of contract such as a default or being past due for 90 days or more;
- the restructuring of a loan or advance by the Company on terms that the Company would not consider otherwise;
- it is probable that the borrower will enter bankruptcy or other financial reorganisation; or
- the disappearance of an active market for a security because of financial difficulties.

The Company measures loss allowances at an amount equal to lifetime expected credit losses, except for the following, which are measured as 12 month expected credit losses:

- debt securities that are determined to have low credit risk at the reporting date; and
- other debt securities and bank balances for which credit risk (i.e. the risk of default occurring over the expected life of the financial instrument) has not increased significantly since initial recognition.

Loss allowances for trade receivables are always measured at an amount equal to lifetime expected credit losses.

Lifetime expected credit losses are the expected credit losses that result from all possible default events over the expected life of a financial instrument.

12-month expected credit losses are the portion of expected credit losses that result from default events that are possible within 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months).

In all cases, the maximum period considered when estimating expected credit losses is the maximum contractual period over which the Company is exposed to credit risk.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating expected credit losses, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Company's historical experience and informed credit assessment and including forward-looking information.

ii. Impairment on financial assets (Continued)

Measurement of expected credit losses

Expected credit losses are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the Company in accordance with the contract and the cash flows that the Company expects to receive).

Presentation of allowance for expected credit losses in the balance sheet

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

2.8 Valuation of Inventories

The Company values its inventories at the lower of cost and net realisable value. Inventory include spares and consumables for heavy equipment assets, bunker and lube oil. Cost is computed on weighted average basis (net of rebates). The cost of bunkers and lube oils is ascertained on first in first out basis.

Net Reliasable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

2.9 Employee benefits

a) Short-term employee benefits

Employee benefits payable wholly within twelve months of rendering the service are classified as short-term employee benefits. These benefits include salaries and wages, bonus, performance incentives, compensated absences such as paid annual leave and sickness leave. The undiscounted amount of short-term employee benefits expected to be paid in exchange for the employee service is recognised as an expense as the related service is rendered by the employee.

b) Long term employee benefits

i) Defined contribution plan

A defined contribution plan is a post-employment benefit plan under which an entity pays fixed contributions into a separate entity and will have no legal or constructive obligation to pay further amounts. The Company makes specified monthly contribution towards employee provident fund, Employee state insurance scheme and labour welfare fund which is recognised as expenses in the standalone statement of Profit and Loss during the year on an accrual basis.

The Company's contribution towards defined contribution benefit plans is accrued in compliance with the respective laws in force at the time.

ii) Defined benefit plans

The Company's gratuity benefit scheme is a defined benefit plan. The Company's net obligation in respect of the defined benefit plan is calculated by estimating the amount of future benefit that employees have earned in return for their service in the current and prior periods; that benefit is discounted to determine its present value. The fair value of any assets are deducted. The calculation of the Company's obligation under the plan is performed annually by a qualified actuary using the projected unit credit method at the balance sheet date.

Remeasurements of the net defined benefit liability, which comprise actuarial gains and losses and the return on plan assets (excluding interest) are recognised in OCI. The Company determines the net interest expense (income) on the net defined benefit liability (asset) for the period by applying the discount rate used to measure the defined benefit obligation at the beginning of the annual period to the then-net defined benefit liability (asset), taking into account any changes in the net defined benefit liability (asset) during the period as a result of contributions and benefit payments. Net interest expense and other expenses related to defined benefit plans are recognised in profit or loss.

When the benefits of a plan are changed or when a plan is curtailed, the resulting change in benefit that relates to past service ('past service cost' or 'past service gain') or the gain or loss on curtailment is recognised immediately in profit or loss. The Company recognises gains and losses on the settlement of a defined benefit plan when the settlement occurs.

iii) Compensated absences

The employees can carry forward a portion of the unutilised accrued compensated absences and utilise it in future service periods or receive cash compensation on termination of employment. To the extent, the employee has an unconditional right to avail the leave, the same is classified as "current". The Company records an obligation for such compensated absences in the period in which the employee renders the services that increase this entitlement. The obligation is measured on the basis of independent actuarial valuation using the projected unit credit method at the balance sheet date. Remeasurements gains or losses are recognised in profit or loss in the period in which they arise.

2.10 Financial instruments

Recognition and initial measurement: Trade receivables are initially recognised at transaction price when they are originated. All financial assets and financial liabilities are initially recognised when the Company becomes a party to the contractual provisions of the instrument. A financial asset or financial liability is initially measured at fair value plus, for an item not at fair value through profit and loss (FVTPL), transaction costs that are directly attributable to its acquisition or issue.

Classification and subsequent measurement:

a) Financial assets

On initial recognition, a financial asset is classified as measured at
- amortised cost;
- FVOCI – debt investment;
- FVOCI – equity investment; or
- FVTPL

Financial assets are not reclassified subsequent to their initial recognition, except if and in the period the Company changes its business model for managing financial assets.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

-the asset is held within a business model whose objective is to hold assets to collect contractual cash flows; and
-the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A debt investment is measured at FVOCI if it meets both of the following conditions and is not designated as at FVTPL:

-the asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
-the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

On initial recognition of an equity investment that is not held for trading, the Company may irrevocably elect to present subsequent changes in the investment's fair value in OCI (designated as FVOCI – equity investment). This election is made on an investment-by-investment basis.

All financial assets not classified as measured at amortised cost or FVOCI as described above are measured at FVTPL. On initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

Business model assessment

The Company makes an assessment of the objective of the business model in which a financial asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

- the stated policies and objectives for the portfolio and the operation of those policies in practice. These include whether management's strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realising cash flows through the sale of the assets
- how the performance of the portfolio is evaluated and reported to the Company's management;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- how managers of the business are compensated – e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- the frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

Transfers of financial assets to third parties in transactions that do not qualify for derecognition are not considered sales for this purpose, consistent with the Company's continuing recognition of the assets.

Financial assets: Assessment whether contractual cash flows are solely payments of principal and interest

For the purposes of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as a profit margin.

In assessing whether the contractual cash flows are solely payments of principal and interest, the Company considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the Company considers:

- contingent events that would change the amount or timing of cash flows;
- terms that may adjust the contractual coupon rate, including variable interest rate features;
- prepayment and extension features; and
- terms that limit the Company's claim to cash flows from specified assets (e.g. non-recourse features).

Financial assets that are held for trading or are managed and whose performance is evaluated on a fair value basis are measured at FVTPL.

Subsequent measurement and gains and losses:

Financial assets at FVTPL

These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognised in profit or loss.

Financial assets at amortised cost

These assets are subsequently measured at amortised cost using the effective interest method. The amortised cost is reduced by impairment losses. Interest income is recognised in profit or loss. Any gain or loss on derecognition is recognised in profit or loss.

Debt investments at FVOCI

These assets are subsequently measured at fair value. Interest income under the effective interest method, foreign exchange gains and losses and impairment are recognised in profit or loss. Other net gains and losses are recognised in OCI. On derecognition, gains and losses accumulated in OCI are reclassified to profit or loss.

Equity investments at FVOCI

These assets are subsequently measured at fair value. Dividends are recognised as income in profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognised in OCI and are not reclassified to profit or loss.

Dividend from investments is recognized when the right to receive the payment is established and when no significant uncertainty as to measurability or collectability exists.

Profit / (loss) on sale of current investments is computed with reference to their weighted average cost.

b) Financial liability

Classification and subsequent measurement

Financial liabilities are classified as measured at amortised cost or FVTPL. A financial liability is classified as at FVTPL if it is classified as held-for-trading, or it is a derivative or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognised in profit or loss. Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in profit or loss. Any gain or loss on derecognition is also recognised in profit or loss.

Derecognition

Financial asset:

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset.

Financial liability:

The Company derecognises a financial liability when its contractual obligations are discharged or cancelled, or expire.

The Company also derecognises a financial liability when its terms are modified and the cash flows under the modified terms are substantially different. In this case, a new financial liability based on the modified terms is recognised at fair value. On derecognition of a financial liability, the difference between the carrying amount extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognised in the standalone financial statements of Profit or Loss.

2.11 Foreign currency transactions

Functional currency is the currency of the primary economic environment in which the Company operates whereas presentation currency is the currency in which the standalone financial statements are presented. Indian Rupee is the functional as well as presentation currency for the Company.

A foreign currency transaction is recorded, on initial recognition in the functional currency, by applying to the foreign currency amount the spot exchange rate between the functional currency and the foreign currency at the date of the transaction.

At the end of each reporting period, foreign currency monetary items are translated using the closing rate whereas non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate at the date of the transaction; and non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was measured.

Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different from those at which they were translated on initial recognition during the period or in previous standalone financial statements are recognised in the Statement of Profit and Loss in the period in which they arise. When a gain or loss on a non-monetary item is recognised in Other Comprehensive Income, any exchange component of that gain or loss is recognised in Other Comprehensive Income. Conversely, when a gain or loss on a non-monetary item is recognised in standalone statement of Profit and Loss, any exchange component of that gain or loss is recognised in standalone statement of Profit and Loss.

2.12 Derivative financial instruments and hedge accounting

The Company holds derivative financial instruments to hedge its foreign currency risk exposures. Embedded derivatives are separated from the host contract and accounted for separately if the host contract is not a financial asset and certain criteria are met.

Derivatives are initially measured at fair value. Subsequent to initial recognition, derivatives are measured at fair value, and changes therein are generally recognised in the standalone financial statements of Profit and Loss.

The Company designates certain derivatives as hedging instruments to hedge variability in cash flows associated with highly probable forecast transactions arising from changes in foreign exchange rates.

At inception of designated hedging relationships, the Company documents the risk management objective and strategy for undertaking the hedge. The Company also documents the economic relationship between the hedged item and the hedging instrument, including whether the changes in cash flows of the hedged item and hedging instrument are expected to offset each other.

Cash flow hedges

When a derivative is designated as a cash flow hedging instrument, the effective portion of changes in the fair value of the derivative is recognised in OCI and accumulated in the other equity under 'effective portion of cash flow hedges'. The effective portion of changes in the fair value of the derivative that is recognised in OCI is limited to the cumulative change in fair value of the hedged item, determined on a present value basis, from inception of the hedge. Any ineffective portion of changes in the fair value of the derivatives is recognised immediately in the standalone financial statements of Profit and Loss.

When the hedged forecast transaction subsequently results in the recognition of a non-financial item such as inventory, the amount accumulated in other equity is included directly in the initial cost of the non-financial item when it is recognised. For all other hedged forecast transactions, the amount accumulated in other equity is reclassified to the standalone financial statements of Profit and Loss in the same period or periods during which the hedged expected future cash flows affect profit or loss.

If a hedge no longer meets the criteria for hedge accounting or the hedging instrument is sold, expires, is terminated or is exercised, then hedge accounting is discontinued prospectively. When hedge accounting for cash flow hedges is discontinued, the amount that has been accumulated in other equity remains there until, for a hedge of a transaction resulting in recognition of a non-financial item, it is included in the non-financial item's cost on its initial recognition or for other cash flow hedges, it is reclassified to the standalone financial statements of Profit and Loss in the same period or periods as the hedged expected future cash flows affect profit or loss.

2.13 Compound Financial Instruments

Compound financial instruments issued by the Company comprise convertible non cumulative redeemable preference shares denominated in INR.

The liability component of a compound financial instrument is initially recognised at the fair value of a similar liability that does not have an equity conversion option. The equity component is initially recognised at the difference between the fair value of the compound financial instrument as a whole and the fair value of the liability component. Any directly attributable transaction costs are allocated to the liability and equity components in proportion to their initial carrying amounts.

Subsequent to initial recognition, the liability component of a compound financial instrument is measured at amortised cost using the effective interest method. The equity component of a compound financial instrument is not remeasured subsequently.

Interest related to the financial liability is recognised in profit or loss (unless it qualifies for inclusion in the cost of an asset). In case of conversion at maturity, the financial liability is reclassified to equity and no gain or loss is recognised.

2.14 Taxation

Income tax expense represents the sum of the current tax and deferred tax:

i) Current tax

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year and any adjustment to the tax payable or receivable in respect of previous years. The amount of current tax reflects the best estimate of the tax amount expected to be paid or received after considering the uncertainty, if any, related to income taxes. It is measured using tax rates (and tax laws) enacted or substantively enacted by the reporting date.

Current tax assets and current tax liabilities are offset only if there is a legally enforceable right to set off the recognised amounts, and it is intended to realise the asset and settle the liability on a net basis or simultaneously.

On 30 March 2019, Ministry of Corporate Affairs has issued amendment regarding the income tax Uncertainty over Income Tax Treatments. As per the Company's assessment, there are no material income tax uncertainties over income tax treatments during the current financial year.

Section 115BAA of the Income Tax Act, 1961 as introduced by the Taxation Laws (Amendment) Ordinance, 2019 with effect from fiscal year 2019-20, allows any domestic company to pay income tax at the rate of 25.17% subject to condition they will not avail any incentive or exemptions and that the accumulated MAT credit would lapse. The Company has opted the lower tax rate.

ii) Deferred tax

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the corresponding amounts used for taxation purposes. Deferred tax is also recognised in respect of carried forward tax losses and tax credits. Deferred tax is not recognised for:

- temporary differences arising on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss at the time of the transaction;
- temporary differences related to investments in subsidiaries, associates and joint arrangements to the extent that the Company is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future; and
- taxable temporary differences arising on the initial recognition of goodwill.

Deferred tax assets are recognised to the extent that it is probable that future taxable profits will be available against which they can be used. The existence of unused tax losses is strong evidence that future taxable profit may not be available. Therefore, in case of a history of recent losses, the Company recognises a deferred tax asset only to the extent that it has sufficient taxable temporary differences or there is convincing other evidence that sufficient taxable profit will be available against which such deferred tax asset can be realised. Deferred tax assets- unrecognised or recognised, are reviewed at each reporting date and are recognised/ reduced to the extent that it is probable/ no longer probable respectively that the related tax benefit will be realised.

Deferred tax is measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on the laws that have been enacted or substantively enacted by the reporting date.

The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Company expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset if there is legally enforceable right to offset current tax liabilities and assets, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realised simultaneously.

Deferred taxes are recognised on temporary differences that arise from the elimination of profits and losses resulting from intraCompany transactions.

Minimum Alternate Tax (MAT) under the provision of Income Tax Act, 1961 is recognised as current tax in the consolidated statement of Profit and Loss. The credit available under the Act in respect of MAT paid is recognised as an asset only when and to the extent there is convincing evidence that the Company will pay normal income tax during the period for which the MAT credit can be carried forward for set off against the normal tax liability. MAT credit recognised as an asset is reviewed at each balance sheet date and written down to the extent the aforesaid convincing evidence no longer exists.

2.15 Lease

On transition to Ind AS 116, the Company elected to apply the practical expedient to grandfather the assessment of which transactions are leases. The Company applied Ind AS 116 only to contracts that were previously identified as leases under Ind AS 17.

At the inception of a contract, the Company assesses whether a contract is or contains, a lease. A contract is, or contains a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange of consideration. To assess whether a contract conveys the right to control the use of an asset the Company assesses whether:

- the contract involves the use of an identified asset – this may be specified explicitly or implicitly, and should be physically distinct or represent substantially all of the capability of a physical distinct asset. If the supplier has a substantive substitution right, then the asset is not identified.
- the company has the right to direct the use of the asset. The company has this right when it has the decision making rights that are most relevant to changing how and for what purpose the asset is used.

Company as a Lessee

Right of use Asset

A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

The Company recognises right-of-use asset representing its right to use the underlying asset for the lease term at the lease commencement date. The cost of the right-of-use asset measured at inception shall comprise of the amount of the initial measurement of the lease liability adjusted for any lease payments made at or before the commencement date less any lease incentives received, plus any initial direct costs incurred and an estimate of costs to be incurred by the lessee in dismantling and removing the underlying asset or restoring the underlying asset or site on which it is located. The right-of-use assets is subsequently measured at cost less any accumulated depreciation, accumulated impairment losses, if any and adjusted for any remeasurement of the lease liability. The right-of-use assets is depreciated using the straight-line method from the commencement date over the shorter of lease term or useful life of right-of-use asset. The estimated useful lives of right-of-use assets are determined on the same basis as those of property, plant and equipment. Right-of-use assets are tested for impairment whenever there is any indication that their carrying amounts may not be recoverable. Impairment loss, if any, is recognised in the statement of profit and loss.

Lease Liability

The Company measures the lease liability at the present value of the lease payments that are not paid at the commencement date of the lease. The lease payments are discounted using the interest rate implicit in the lease, if that rate can be readily determined. If that rate cannot be readily determined, the Company uses incremental borrowing rate. For leases with reasonably similar characteristics, the company, on a lease-by-lease basis, may adopt either the incremental borrowing rate specific to the lease or the incremental borrowing rate for the portfolio as a whole. The lease payments shall include fixed payments, exercise price of a purchase option where the company is reasonably certain to exercise that option and payments of penalties for terminating the lease, if the lease term reflects the lessee exercising an option to terminate the lease. The lease liability is subsequently remeasured by increasing the carrying amount to reflect interest on the lease liability, reducing the carrying amount to reflect the lease payments made and remeasuring the carrying amount to reflect any reassessment or lease modifications or to reflect revised in-substance fixed lease payments. The company recognises the amount of the re-measurement of lease liability due to modification as an adjustment to the right-of-use asset and statement of profit and loss depending upon the nature of modification. Where the carrying amount of the right-of-use asset is reduced to zero and there is a further reduction in the measurement of the lease liability, the company recognises any remaining amount of the re-measurement in statement of profit and loss.

The Company has elected not to apply the requirements of Ind AS 116 Leases to short-term leases of all assets that have a lease term of 12 months or less and leases for which the underlying asset is of low value. The lease payments associated with these leases are recognized as an expense on a straight-line basis over the lease term.

Company as a lessor

Leases in which the Company does not transfer substantially all the risks and rewards of ownership of an asset are classified as operating leases. Rental income from operating lease is recognised on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

2.16 Provisions and Contingent Liabilities and Contingent Assets

A provision is recognised if, as a result of a past event, the Company has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows (representing the best estimate of the expenditure required to settle the present obligation at the balance sheet date) at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The unwinding of the discount is recognised as finance cost

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non occurrence of one or more uncertain future events not wholly within the control of the company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount cannot be made.

Contingent assets are neither recognised, nor disclosed in the standalone financial statements.

2.17 Earnings per share

Basic earning per share is calculated by dividing net profit or loss attributable to equity shareholders of the Company by the weighted average number of equity shares outstanding during the year.

Diluted earning per share is calculated by dividing net profit or loss attributable to equity shareholders of the Company by the weighted average number of equity shares and dilutive equity equivalent shares outstanding during the year, except where the results would be anti-dilutive.

2.18 Cash flow Statement

Cash flows are reported using the indirect method, whereby profit before tax is adjusted for the effects of transactions of a non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from regular revenue generating, financing and investing activities of the Company are segregated.

2.19 Cash and cash equivalents

Cash and cash equivalents for the purpose of cash flow statement comprise cash on hand and cash at bank including fixed deposit with original maturity period of three months or less and bank overdrafts that are repayable on demand form an integral part of the Company's cash management.

2.20 Government grants

Government grants are recognised in the period to which they relate when there is reasonable assurance that the grant will be received and the Company will comply with the attached conditions.

Government grants are recognised in the standalone financial statements of Profit and Loss on a system basis over the period.

Income from Services Exports from India Scheme ("SEIS") incentives are Government's Foreign Trade Policy 2015-20 on port services income are classified as "Revenue from Operations" and is recognized based on effective rate of incentive under the scheme, provided under no significant uncertainty exists for the measurability, realization and utilization of credit under the scheme. The receivables related to SEIS licenses are classified as " Other Non-Financial Current Assets".

2.21 New and amended standard adopted by the Company

The ministry of corporate Affairs vide notification dated 31 March 2023 notified the companies (Indian Accounting Standards) Amedment Rules, 2023, which amended certain accounting standards (see below), and are effective 1 April 2023:

- Disclosure of accounting policies- amedment to Ind AS 1.
- Definition of accounting estimates- amendment to Ind AS 8.
- Deferred tax related to assets and liabilities arising from a single transaction- amedment to Ind AS 12.

The other amedments to Ind AS notified by these rules are primarily in the nature of clarifications.

These amendments did not have any material impact on the amounts recognised in prior periods and are not expected to significantly affect the current or future periods. Specifically, no changes would be necessary as a consequence of amedment made to Ind AS 12 as the group accounting policy already complies with the now mandatory treatment.

2.22 Exposure draft & standard issued but not effective:

Standard issued but not yet effective:

The employees Gratuity Fund scheme managed by the Life Insurance Corporation of India (LIC) is a defined benefit plan. The present value of obligation is determined by the LIC based on actuarial valuation. The principal assumptions are the discount rate and salary growth rate. The discount rate is based upon the prevailing market yields of Indian government securities as at the balance sheet date for the estimated term of the obligation. Estimates of future salary increases, considered in actuarial valuation, take account of inflation, seniority, promotion and other relevant factors, such as supply and demand in the employment market.

A. Accounting classification and fair values (Continued)

The fair value hierarchy is based on inputs to valuation techniques that are used to measure fair value that are either observable or unobservable and consists Level 1 - category includes financial assets and liabilities, that are measured in whole or in significant part by reference to published quotes in an active market.

Level 2 - category includes financial assets and liabilities measured using a valuation technique based on assumptions that are supported by prices from observable current market transactions. These include assets and liabilities for which pricing is obtained via pricing services, but where prices have not been determined in an active market. financial assets with fair values based on broker quotes and assets that are valued using the Company's own valuation models whereby the material assumptions are market observable.

Level 3 - category includes financial assets and liabilities measured using valuation techniques based on non-market observable inputs. This means that fair values are determined in whole or in part using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instrument nor are they based on available market data. However, the fair value measurement objective remains the same, that is, to estimate an exit price from the perspective of the Company.

The fair value of the financial instruments as referred to in note A above has been classified into three categories depending on the inputs used in the valuation technique. The hierarchy gives the highest priority to quoted prices in active market for identical assets or liabilities (Level 1 measurements) and lowest priority to unobservable inputs (Level 3 measurements).

The Company has not disclosed financial instruments such as cash and cash equivalents, trade payables and receivables etc. at carrying value because their carrying amounts are a reasonable approximation of the fair values due to their short term nature.

B. Calculation of fair value

Valuation techniques and significant unobservable inputs

The following table shows the valuation techniques used in measuring Level 2 and Level 3 fair values for financial instruments measured at fair value in the balance sheet, as well as the significant unobservable inputs used.

Financial instruments measured at fair value

Type	Valuation technique	Significant unobservable inputs	Inter-relationship between significant unobservable inputs and fair value measurement
Non current financial assets and liabilities measured at amortised cost	Discounted cash flows: The valuation model considers the present value of expected receipt /payments discounted using appropriate discounting rates.	Not applicable	Not applicable
Current investment in mutual funds	The fair values of investments in mutual fund units is based on the net asset value (NAV) as stated by the issuers of these mutual fund units in the published statements as at Balance Sheet date. NAV represents the price at which the issuer will issue further units of mutual fund and the price at which issuer will redeem such units from the investors.	Not applicable	Not applicable
Non current borrowings	Discounted cash flows: The valuation model considers the present value of expected payments, discounted using a risk adjusted discount rate	Not applicable	Not applicable
Non-current investments in unquoted instruments accounted for as fair value through profit and loss	Discounted cash flow approach: The valuation model considers the present value of expected receipts, discounted using a risk adjusted discount rate.	- Average cost of borrowings (0.50%) - Dividend payout- Nil	The estimated fair value would increase / (decrease) if: -the average borrowing cost were lower (higher) -risk adjusted discount rate were lower (higher) -Dividend payout were lower (higher)
Guarantee Commission	The determination of fair value of guarantee commission is based on the market prices of comparable instrument with similar tenure and bearing similar counterparty credit risk.	- Commission rate	Commission rate is determined using rate of comparable instrument of banks that can not be verified

Transfers between Levels 1 and 2

There have been no transfers between Level 1 and Level 2 during the reporting periods

Net financial liability at variable rate	42,205.02	40,261.81

Fair value sensitivity analysis for fixed-rate instruments

The Company's fixed rate bank deposits and loans to its subsidiaries are carried at amortised cost. They are therefore not subject to interest rate risk as defined in IND AS 107, since neither the carrying amount nor the future cash flow will fluctuate because of a change in market interest rates.

Cash flow sensitivity analysis for variable-rate instruments

The sensitivity analysis for floating rate liabilities is prepared assuming the amount of liability outstanding at the end of the reporting period was outstanding for the whole period. A reasonable possible change of 100 basis points (100 bps) in interest rate at the reporting date would have increased / (decreased) profit after tax and equity by the amount shown below:

	Profit or (loss)		Equity, net of tax	
	100 bp increase	100 bp decrease	100 bp increase	100 bp decrease
31 March 2024				
Variable-rate instruments	(422.05)	422.05	(315.82)	315.82
31 March 2023				
Variable-rate instruments	(402.62)	402.62	(301.28)	301.28

37 Capital management

The key objective of the Company's capital management is to ensure that it maintains a stable capital structure with the focus on total equity to uphold investor, creditor and customer confidence and to ensure future development of the business. The Company is focused on maintaining a strong equity base to ensure independence, security as well as financial flexibility for potential future borrowings, if required, without impacting the risk profile of the Company. In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements together with other notes thereon and attached thereto give the information required by the Companies Act, 2013 (herein referred to as 'Act') in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2024, and profit/loss, changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Companies Act, 2013 and the Rules there under, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibility of Management for Financial Statements

The Company's Board of Directors are responsible for the matters stated in section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance, changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Ind AS specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statement that give a true and fair view and are free from material misstatement, whether due to fraud or error.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all

relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Annexure –B to the Independent Auditor’s Report of even date on the Financial Statement of J M Baxi Container Holdings Private Limited

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”)

We have audited the internal financial controls over financial reporting of **J M Baxi Container Holdings Private Limited** (“the Company”) as of 31st March, 2024 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

Management’s Responsibility for Internal Financial Controls

The Company’s management is responsible for establishing and maintaining internal financial controls based on “the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors’ Responsibility

Our responsibility is to express an opinion on the Company’s internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the “Guidance Note”) and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness.

Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company’s internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31st March, 2024 based on , "the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India".

1A Company overview

J M Baxi Container Holdings Private Limited ("the Company") was incorporated on 21 June 2023 with an objective to carry on the business in India or elsewhere of providing ports and logistics services. The Company is a subsidiary of JM Baxi Ports & Logistics Private Limited.

1B Basis of preparation

i Statement of compliance

The financial statements have been prepared in accordance with Indian Accounting Standards (Ind AS) as per the Companies (Indian Accounting Standards) Rules, 2015 notified under Section 133 of Companies Act, 2013, (the 'Act') and other relevant provisions of the Act.

The financial statements for the year ended 31 March 2024 have been approved by the Board of Directors at their meeting held on 11 June 2024.

Details of Company's Accounting Policies are included in Note 2, to the financial statement.

ii Going concern

Based on the future business plans and cash flows of the Company, and the financial support from the shareholders of the Company, the management believes that the Company, as at 31 March 2024, will continue to operate as a going concern for the foreseeable future, realise its assets and discharge its liabilities as they fall due for payment, in the normal course of business.

iii Basis of measurement

The financial statements are prepared under the historical cost convention, except for the following:

- certain financial assets and liabilities that are measured at fair value; and
- net defined benefit (asset)/ liability that are measured at fair value of plan assets less present value of defined benefit obligations.

iv Functional and presentation currency

These financial statements are presented in Indian Rupees (INR), which is also the Company's functional currency. All amounts have been rounded-off to the nearest lakhs, unless otherwise indicated.

v Use of estimates and judgements

The preparation of financial statements in conformity with Generally Accepted Accounting Principles in India requires the management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities on the date of financial statements. Management believes that the estimates made in the preparation of the financial statements are prudent and reasonable. Actual results may differ from these estimates. Any revision to the accounting estimates is recognised prospectively in current and future periods.

J M Baxi Container Holdings Private Limited

Notes to the financial statements

for the period ending 31 March 2024

(Currency: Indian rupees in lakhs)

v Use of estimates and judgements (Continued)

a) Useful lives of property, plant and equipment and intangible assets

Determination of the estimated useful lives of tangible assets and the assessment as to which components of the cost may be capitalised. Useful lives of tangible assets are based on the life prescribed in Schedule II of the Companies Act, 2013. In cases, where the useful lives are different from that prescribed in Schedule II, they are based on technical advice, taking into account the nature of the asset, the estimated usage of the asset, the operating conditions of the asset, past history of replacement, anticipated technological changes, manufacturers' warranties and maintenance support. Assumptions also need to be made, when the Company assesses, whether an asset may be capitalised and which components of the cost of the asset may be capitalised.

vi Measurement of fair values

The company's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities.

The company has an established control framework with respect to the measurement of fair values, which includes overseeing all significant fair value measurement, including level 3 fair values by the management. The management regularly reviews significant unobservable inputs and valuation adjustments. If third party information, such as broker quotes or pricing services, is used to measure fair values, then the management assesses the evidence obtained from the third parties to support the conclusion that such valuations meet the requirements of Ind AS, including the level in the fair value hierarchy in which such valuations should be classified.

When measuring the fair value of a financial asset or a financial liability, the company uses observable market data as far as possible. Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows.

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement. The company recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

Income tax expense represents the sum of the current tax and deferred tax:

i) Current tax

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year and any adjustment to the tax payable or receivable in respect of previous years. ii) Deferred tax

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the corresponding amounts used for taxation purposes. Deferred tax is also recognised in respect of carried forward tax losses and tax credits. Deferred tax is not recognised for:

- temporary differences arising on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss at the time of the transaction;
- temporary differences related to investments in subsidiaries, associates and joint arrangements to the extent that the Company is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future; and
- taxable temporary differences arising on the initial recognition of goodwill.

Deferred tax assets are recognised to the extent that it is probable that future taxable profits will be available against which they can be used. The existence of unused tax losses is strong evidence that future taxable profit may not be available. Therefore, in case of a history of recent losses, the Company recognises a deferred tax asset only to the extent that it has sufficient taxable temporary differences or there is convincing other evidence that sufficient taxable profit will be available against which such deferred tax asset can be realised. Deferred tax assets- unrecognised or recognised, are reviewed at each reporting date and are recognised/ reduced to the extent that it is probable/ no longer probable respectively that the related tax benefit will be realised.

Deferred tax is measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on the laws that have been enacted or substantively enacted by the reporting date.

The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Company expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset if there is legally enforceable right to offset current tax liabilities and assets, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realised simultaneously.

2.5 Statement of Cash flows

Cash flows are reported using the indirect method, whereby profit before tax is adjusted for the effects of transactions of a non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from regular revenue generating, financing and investing activities of the Company are segregated.

INDEPENDENT AUDITOR'S REPORT

To the Members of

J M Baxi Ports Services Private Limited**Report on the Audit of the Financial Statements****Opinion**

We have audited the financial statements of **J M Baxi Ports Services Private Limited** ("the Company"), which comprise the balance sheet as at 31st March 2024, and the statement of Profit and Loss, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements together with other notes thereon and attached thereto give the information required by the Companies Act, 2013 (herein referred to as 'Act') in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2024, and profit/loss, changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Companies Act, 2013 and the Rules there under, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibility of Management for Financial Statements

The Company's Board of Directors are responsible for the matters stated in section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance, changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Ind AS specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statement that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern

and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are also responsible for overseeing the company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with

relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Annexure –B to the Independent Auditor’s Report of even date on the Financial Statement of J M Baxi Ports Services Private Limited

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”)

We have audited the internal financial controls over financial reporting of **J M Baxi Ports Services Private Limited** (“the Company”) as of 31st March, 2024 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

Management’s Responsibility for Internal Financial Controls

The Company’s management is responsible for establishing and maintaining internal financial controls based on “the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors’ Responsibility

Our responsibility is to express an opinion on the Company’s internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the “Guidance Note”) and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness.

Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company’s internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31st March, 2024 based on , "the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India".

The financial statements for the year ended 31 March 2024 have been approved by the Board of Directors at their meeting held on 11 June 2024

Details of Company's Accounting Policies are included in Note 2. to the financial statement.

ii Going concern

Based on the future business plans and cash flows of the Company, and the financial support from the shareholders of the Company, the management believes that the Company, as at 31 March 2024, will continue to operate as a going concern for the foreseeable future, realise its assets and discharge its liabilities as they fall due for payment, in the normal course of business.

iii Basis of measurement

The financial statements are prepared under the historical cost convention, except for the following:

- certain financial assets and liabilities that are measured at fair value; and
- net defined benefit (asset)/ liability that are measured at fair value of plan assets less present value of defined benefit obligations.

iv Functional and presentation currency

These financial statements are presented in Indian Rupees (INR), which is also the Company's functional currency. All amounts have been rounded-off to the nearest lakhs, unless otherwise indicated.

v Use of estimates and judgements

The preparation of financial statements in conformity with Generally Accepted Accounting Principles in India requires the management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities on the date of financial statements. Management believes that the estimates made in the preparation of the financial statements are prudent and reasonable. Actual results may differ from these estimates. Any revision to the accounting estimates is recognised prospectively in current and future periods.

Notes to the financial statements

v Use of estimates and judgements (Continued)

a) Useful lives of property, plant and equipment and intangible assets

Determination of the estimated useful lives of tangible assets and the assessment as to which components of the cost may be capitalised. Useful lives of tangible assets are based on the life prescribed in Schedule II of the Companies Act, 2013. In cases, where the useful lives are different from that prescribed in Schedule II, they are based on technical advice, taking into account the nature of the asset, the estimated usage of the asset, the operating conditions of the asset, past history of replacement, anticipated technological changes, manufacturers' warranties and maintenance support. Assumptions also need to be made, when the Company assesses, whether an asset may be capitalised and which components of the cost of the asset may be capitalised.

vi Measurement of fair values

The company's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities.

The company has an established control framework with respect to the measurement of fair values, which includes overseeing all significant fair value measurement, including level 3 fair values by the management. The management regularly reviews significant unobservable inputs and valuation adjustments. If third party information, such as broker quotes or pricing services, is used to measure fair values, then the management assesses the evidence obtained from the third parties to support the conclusion that such valuations meet the requirements of Ind AS, including the level in the fair value hierarchy in which such valuations should be classified.

When measuring the fair value of a financial asset or a financial liability, the company uses observable market data as far as possible. Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows.

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement. The company recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

- ii) it is held primarily for the purpose of being traded;
- iii) it is expected to be realised within twelve months after the reporting date; or
- iv) it is cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting date.

b) All assets other than current assets shall be classified as non-current.

c) A liability shall be classified as current when it satisfies any of the following criteria:

- i) it is expected to be settled in the company's normal operating cycle;
- ii) it is held primarily for the purpose of being traded;
- iii) it is due to be settled within twelve months after the reporting date; or

2.3 Taxation

Income tax expense represents the sum of the current tax and deferred tax:

i) Current tax

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year and any adjustment to the tax payable or receivable in respect of previous years. The amount of current tax reflects the best estimate of the tax amount expected to be paid or received after considering the uncertainty, if any, related to income taxes. It is measured using tax rates (and tax laws) enacted or substantively enacted by the reporting date.

Current tax assets and current tax liabilities are offset only if there is a legally enforceable right to set off the recognised amounts, and it is intended to realise the asset and settle the liability on a net basis or simultaneously.

ii) Deferred tax

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the corresponding amounts used for taxation purposes. Deferred tax is also recognised in respect of carried forward tax losses and tax credits. Deferred tax is not recognised for:

- temporary differences arising on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss at the time of the transaction;
- temporary differences related to investments in subsidiaries, associates and joint arrangements to the extent that the Company is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future; and
- taxable temporary differences arising on the initial recognition of goodwill.

Deferred tax assets are recognised to the extent that it is probable that future taxable profits will be available against which they can be used. The existence of unused tax losses is strong evidence that future taxable profit may not be available. Therefore, in case of a history of recent losses, the Company recognises a deferred tax asset only to the extent that it has sufficient taxable temporary differences or there is convincing other evidence that sufficient taxable profit will be available against which such deferred tax asset can be realised. Deferred tax assets- unrecognised or recognised, are reviewed at each reporting date and are recognised/ reduced to the extent that it is probable/ no longer probable respectively that the related tax benefit will be realised.

Deferred tax is measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on the laws that have been enacted or substantively enacted by the reporting date.

The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Company expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset if there is legally enforceable right to offset current tax liabilities and assets, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realised simultaneously.

2.4 Earnings per share

Basic earning per share is calculated by dividing net profit or loss attributable to equity shareholders of the company by the weighted average number of equity shares outstanding during the year.

Diluted earning per share is calculated by dividing net profit or loss attributable to equity shareholders of the company by the weighted average number of equity shares and dilutive equity equivalent shares outstanding during the year, except where the results would be anti-dilutive.

2.5 Statement of Cash flows

Cash flows are reported using the indirect method, whereby profit before tax is adjusted for the effects of transactions of a non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from regular revenue generating, financing and investing activities of the Company are segregated.

2.6 Cash and cash equivalents

Cash and cash equivalents for the purpose of cash flow statement comprise cash on hand and cash at bank including fixed deposit with original maturity period of three months or less and short term highly liquid investments with an original maturity of three months or less.

The rationale and benefits of the proposed Scheme are as under:

“The Demerged Company is inter alia engaged in Container Business, Non-Container Business and Corporate Services Business. The management believes that the risk and reward associated with each of the aforesaid businesses are different with different stakeholders. As part of restructuring of its businesses and with a view to achieve strategic independence of its business verticals (unlocking the potential of each of the businesses) and to leverage the expertise of its strategic investor, the management of the Demerged Company proposes to (i) demerge the Demerged Undertaking 1, on a going concern basis, into J M Baxi Container; and (ii) demerge the Demerged Undertaking 2, on a going concern basis, into J M Baxi Dev Co. Further, the Demerged Company shall continue to be engaged in the Non-Container Business. The management believes that the proposed segregation of business

shall benefit all stakeholders of the Companies and also result in the following benefits:

- 1. The Demerged Undertakings have achieved scale and experience to sustain business based on their own strengths. Additionally, these businesses deal with different sets of industry dynamics in the form of nature of risks, competition, challenges, opportunities and business methods. Hence, segregation of the Identified Container Business and Corporate Services Business would enable focused management and enable exploring the potential business opportunities more effectively and efficiently.*
- 2. The Demerger will enable both Demerged Company and the Resulting Companies to enhance business operations by streamlining operations, cutting costs, more efficient management control and outlining independent growth strategies.*
- 3. The Demerger will allow the management to devise, implement and pursue independent business strategies for the Identified Container Business, Non-Container Business and Corporate Services Business which will enable wider scope for independent collaboration, investment opportunities and expansion.*
- 4. The Resulting Company 1, with clear identity of being an Identified Container Business will enable right customer attention resulting in deeper market penetration.*
- 5. The Resulting Company 2, with clear identity of being in the Corporate Services Business, will enable to drive overall strategy, manage bidding for new and performance of existing businesses.*
- 6. Ability to leverage financial and operational resources in each business will lead to possibilities of joint ventures and associations with other industry participants, both in India and globally, and will facilitate attracting greater talent pool.*

7. *Each business will be able to address independent business opportunities with efficient capital allocation and attract different set of investors, strategic partners, lenders and other stakeholders, thus leading to enhanced value creation, which is in the best interest of the Demerged Company and Resulting Companies and their respective stakeholders.*
8. The Board of Directors of the Applicant Companies in their respective meetings dated 29.02.2024, have approved the Scheme. Further on 17.06.2024, the Board of Directors of the Applicant Companies approved amendments to the Scheme.
9. The term '**Appointed Date**' is defined under Clause 1.2 of the Scheme as follows:
- “1.2 “Appointed Date” means the Effective Date, or such other date as may be approved by the National Company Law Tribunal or such other competent authority / Appropriate Authority.”*
10. The term '**Effective Date**' is defined under Clause 1.14 of the Scheme as follows:
- “1.14 Effective Date” in relation to the Scheme, means the date or last of the dates on which (i) certified copies of the order of the NCLT sanctioning the Scheme are filed by the Demerged Company and the Resulting Companies with the Registrar of Companies, Mumbai or (ii) the last of the approvals specified under Clause 31.1 is obtained. References in this Scheme to the date of “coming into effect of this Scheme” or “upon the Scheme becoming effective” or “effectiveness of this Scheme” or “Scheme becomes effective” shall mean the Effective Date.”*
11. Ld. Senior Counsel submitted that the Appointed Date under the Scheme is in accordance with the General Circular No. 9 of 2019 dated 21 August 2019 (and numbered as F. No. 7/12/2019/CL-1), as issued by the Ministry of Corporate Affairs, Government of India (**MCA Circular**). Ld. Senior Counsel further submitted that the MCA Circular provides that the 'appointed date' in a scheme can be tied to the occurrence of an event

or fulfilment of any preconditions which are relevant to the scheme and as agreed by the parties. 2. **Applicant Company No. 1:**

2.1. Applicant Company No. 1 was incorporated on 6 November 1947 under the name of '*United Liner Agencies of India Private Limited*' under the provisions of the Indian Companies Act, 1913. Thereafter, the name of Applicant Company No. 1 has undergone

changes and conversions from first, a private company to a public company, and thereafter from a public company to a private company. With effect from 15 September 2021, the name of Applicant Company No. 1 was changed to J M Baxi Ports & Logistics Private Limited.

2.2. Applicant Company No. 1 is engaged in the ports and logistics business directly and indirectly through investments in special purpose vehicles. The business activities of Applicant Company No. 1 comprise projects awarded pursuant to the concession / license agreements under the public-private-partnership model entered between the concessioning authorities / competent authorities and the special purpose companies with Applicant Company No. 1 as the applicant / selected bidder (either by itself or as a member of a consortium). In this regard, Ld. Senior Counsel submitted that HL Terminal Holding B.V. is a 40% shareholder of Applicant Company No. 1 as on 30 April 2024 and has made substantial investment in Applicant Company No. 1.

3. Applicant Company No. 2:

3.1. Applicant Company No. 2 was incorporated on 21 June 2023 under the provisions of the Act.

3.2. It is incorporated for the purpose of carrying on the container business of Applicant Company No. 1.

Applicant Company Nos. 2 and 3 are wholly owned subsidiaries of Applicant Company No. 1.
6. The shares or any other securities of the Applicant Companies are not listed on any stock exchange, in India or any other country.
7. **Rationale of the Scheme:**

The rationale and benefits of the proposed Scheme are as under:

“The Demerged Company is inter alia engaged in Container Business, Non-Container Business and Corporate Services Business. The management believes that the risk and reward associated with each of the aforesaid businesses are different with different stakeholders. As part of restructuring of its businesses and with a view to achieve strategic independence of its business verticals (unlocking the potential of each of the businesses) and to leverage the expertise of its strategic investor, the management of the Demerged Company proposes to (i) demerge the Demerged Undertaking 1, on a going concern basis, into J M Baxi Container; and (ii) demerge the Demerged Undertaking 2, on a going concern basis, into J M Baxi Dev Co. Further, the Demerged Company shall continue to be engaged in the Non-Container Business. The management believes that the proposed segregation of business

shall benefit all stakeholders of the Companies and also result in the following benefits:

- 1. The Demerged Undertakings have achieved scale and experience to sustain business based on their own strengths. Additionally, these businesses deal with different sets of industry dynamics in the form of nature of risks, competition, challenges, opportunities and business methods. Hence, segregation of the Identified Container Business and Corporate Services Business would enable focused management and enable exploring the potential business opportunities more effectively and efficiently.*
- 2. The Demerger will enable both Demerged Company and the Resulting Companies to enhance business operations by streamlining operations, cutting costs, more efficient management control and outlining independent growth strategies.*
- 3. The Demerger will allow the management to devise, implement and pursue independent business strategies for the Identified Container Business, Non-Container Business and Corporate Services Business which will enable wider scope for independent collaboration, investment opportunities and expansion.*
- 4. The Resulting Company 1, with clear identity of being an Identified Container Business will enable right customer attention resulting in deeper market penetration.*
- 5. The Resulting Company 2, with clear identity of being in the Corporate Services Business, will enable to drive overall strategy, manage bidding for new and performance of existing businesses.*
- 6. Ability to leverage financial and operational resources in each business will lead to possibilities of joint ventures and associations with other industry participants, both in India and globally, and will facilitate attracting greater talent pool.*

7. *Each business will be able to address independent business opportunities with efficient capital allocation and attract different set of investors, strategic partners, lenders and other stakeholders, thus leading to enhanced value creation, which is in the best interest of the Demerged Company and Resulting Companies and their respective stakeholders.*
8. The Board of Directors of the Applicant Companies in their respective meetings dated 29.02.2024, have approved the Scheme. Further on 17.06.2024, the Board of Directors of the Applicant Companies approved amendments to the Scheme.
9. The term '**Appointed Date**' is defined under Clause 1.2 of the Scheme as follows:
- “1.2 “Appointed Date” means the Effective Date, or such other date as may be approved by the National Company Law Tribunal or such other competent authority / Appropriate Authority.”*
10. The term '**Effective Date**' is defined under Clause 1.14 of the Scheme as follows:
- “1.14 Effective Date” in relation to the Scheme, means the date or last of the dates on which (i) certified copies of the order of the NCLT sanctioning the Scheme are filed by the Demerged Company and the Resulting Companies with the Registrar of Companies, Mumbai or (ii) the last of the approvals specified under Clause 31.1 is obtained. References in this Scheme to the date of “coming into effect of this Scheme” or “upon the Scheme becoming effective” or “effectiveness of this Scheme” or “Scheme becomes effective” shall mean the Effective Date.”*
11. Ld. Senior Counsel submitted that the Appointed Date under the Scheme is in accordance with the General Circular No. 9 of 2019 dated 21 August 2019 (and numbered as F. No. 7/12/2019/CL-1), as issued by the Ministry of Corporate Affairs, Government of India (**MCA Circular**). Ld. Senior Counsel further submitted that the MCA Circular provides that the 'appointed date' in a scheme can be tied to the occurrence of an event

or fulfilment of any preconditions which are relevant to the scheme and as agreed by the parties. In the present Application, the Appointed Date is the Effective Date, which is conditional upon obtaining the approvals specified in Clause 31.1 of the Scheme.
